

QUARTERLY REPORT

FUND FOR UFO RESEARCH

P.O. BOX 277

MT. RAINIER, MD. 20712

3rd Quarter 1999, July-September

News items

A French report has been released claiming UFOs are real and are possibly a security risk and need to be studied. The report was authored by former French defense officials and others, and appeared in the July 17, 1999, issue of a French magazine known as VSD. An English translation does not yet exist.

A former NASA employee, Clark McClelland, reports that the space agency is more knowledgeable about UFOs than it has admitted. McClelland has gone public with a web site: www.stargate-chronicles.com. There is also a book in the works.

MUFON Symposium

The 1999 MUFON symposium was held in Arlington, VA on July 2-4. The Friday press conference was covered by the Washington Post and the Washington Times. Attendance was approximately 550, and the Fund's Sunday brunch attracted 116 guests. Australian Kelly Cahill was a fascinating speaker at both the brunch and the conference. The Cahill book, published in Australia, was given to brunch participants as part of the brunch package and is available from the Fund.

Future publications

Future publications include a study for The Research Coalition (CUFOS, FUFOR, and MUFON) by Dick Hall of UFO sightings between 1897 and 1947.

The Fund's long-awaited issue paper exploring the effects of ET reality on society is nearing completion, with most contributions now turned in.

New publications

New publications are as follows:

The Swiss Air Report

Grudge Document

NICAP Press Conference Transcript, a CD-ROM

Web site

A special meeting was setup for the purpose of revamping and revising the Fund web site.
